Key to Assurance Levels

Assurance Gradings

Internal Audit classifies internal audit assurance over four categories, defined as follows:

Assurance Level	Evaluation & Testing Conclusion
Substantial	There is a robust system of internal controls operating effectively to ensure that risks are managed and process objectives achieved.
Reasonable	The system of internal controls is generally adequate and operating effectively but some improvements are required to ensure that risks are managed and process objectives achieved.
Limited	The system of internal controls is generally inadequate or not operating effectively and significant improvements are required to ensure that risks are managed and process objectives achieved.
No	There is a fundamental breakdown or absence of core internal controls requiring immediate action.

Recommendation Gradings

Internal Audit categorises recommendations according to their level of priority as follows:

Priority level	Definition
1. Urgent	Fundamental control issue on which action should be taken immediately.
2. Important	Control issue on which action should be taken at the earliest opportunity.
3. Routine	Control issue on which action should be taken.
OEM – Operational Effectiveness Matter	Items that would be best practise / improvements, but do not impact on the effectiveness of the controls.
